

# FIND MY BUS

## with Shoreline Metro's Bus Tracking App for Android

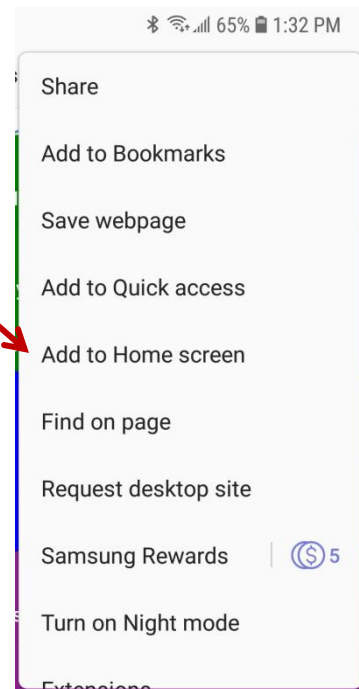

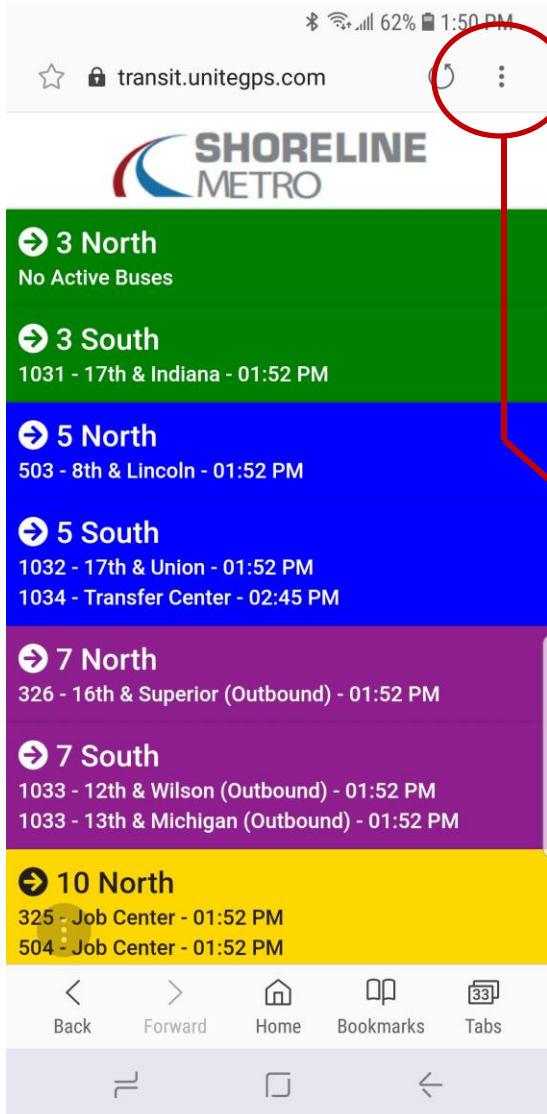

### 1. Create App on Mobile Device

Open the **Chrome** app  or **Samsung Internet** app .

Enter the web address [transit.unitegps.com/sm](https://transit.unitegps.com/sm).

Your screen should match the example to the left. If not, check the web address you entered.\*

The next step is to create the app for your device's home screen by clicking on the icon (circled) at the top right of your screen. A dialogue box pops up. Click "Add to Home Screen".

*\*Not all Android web browser versions have this feature. Individual devices and app versions will vary.*

# 2. Track Your Bus in the App

Open the app on your mobile device.

To view a bus on its route, tap/click on any of the route banners to expand the map.

The expanded map shows the bus location (red or green circle with white directional arrow) and time points (orange dots). The bus location refreshes every five seconds.

To see all stops on the route, click the box labeled "Stop List".

To view a different route, click the "route banner" to hide the current route map.

Bus Location

- Red Circle – Bus Stopped
- Green Circle – Bus Moving

Bus Route

# 3. Enjoy. Here are some Tips.

- Click on the Bus Location to reveal the bus number.
- Pinching allows you to zoom in on the Bus Location.
- Bus Location is in real-time (within 3-seconds of actual location).
- The active bus will appear off route (previous route) if it hasn't been to the Transfer Station for the start of the current route.
