

FIND MY BUS

with Shoreline Metro's Bus Tracking App for iOS

1. Create App on Mobile Device

Open the **Safari** app  on your iPhone or iPad.

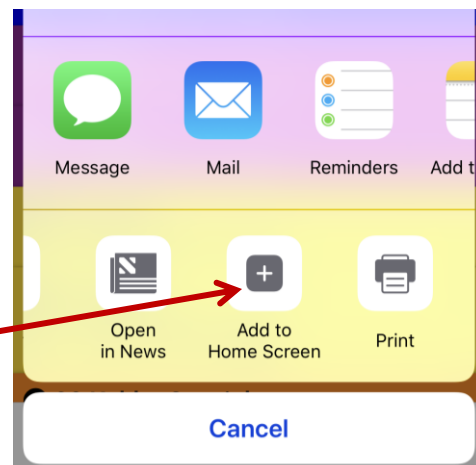

Enter the web address transit.unitegps.com/sm.

Your screen should match the example to the left. If not, check the web address you entered.*

The next step is to create the app for your device's home screen by clicking on the icon (circled) at the bottom of your screen. A dialogue box pops up. Click "Add to Home Screen".

The option to rename the app appears next. Click "add".

**Not all web browsers have this feature. Individual devices and app versions will vary.*

For more information, visit www.shorelinemetro.com

2. Track Your Bus in the App

Open the app on your mobile device.

transit.unitegps.com/sm

To view a bus on its route, tap/click on any of the route banners to expand the map.

The expanded map shows the bus location (red or green circle with white directional arrow) and time points (orange dots). The bus location refreshes every five seconds.

To see all stops on the route, click the box labeled "Stop List".

To view a different route, click the "route banner" to hide the current route map.

- Green Circle – Bus Moving

Bus Route

3. Enjoy. Here are some Tips.

- Click on the Bus Location to reveal the bus number.
- Pinching allows you to zoom in on the Bus Location.
- Bus Location is in real-time (within 3-seconds of actual location).
- The active bus will appear off route (previous route) if it hasn't been to the Transfer Station for the start of the current route.
